

DIY Fire Starters

Use any of the following to start a fire.

- Dorito chips (any greasy chips work)
- Dryer lint stuffed in a toilet paper tube
- Cotton balls soaked with vaseline
- Sawdust covered in wax (muffin tin works great for a mold)
- Soak pinecones in old cooking oil or wax
- Soak corks in rubbing Alcohol with a lid til ready to use
- Use a completely dried orange peel
- Twist wax paper around sawdust or lint and twist the ends
- Use smudge sticks (sage and dried herbs)
- Spray logs with bug spray(not for cooking on)
- Hand sanitizer with alcohol (not for cooking on)
- Dip corncobs in oil for cooking fire or gasoline for heat fire
- Paper towels or newspaper dipped in bacon grease
- Find dead, fallen pine trees, use the splintered wood as starters
